INDEX TO VOLUME 60

January to December, 1955

The articles and references compiled in this index have been listed alphabetically. A subject related to a major topic has been listed under the major topic. For instance, an article dealing with a new mining machine and its operation will be found under the title "Mechanization." An article on shuttle cars will be found under "Transportation." Unclassified articles, or those that cannot be placed in any major category, have been listed within the index alphabetically.

Editorals, marked (e), will be found under the subject with which they deal. Many article titles have been abbreviated to give prominence to important words and ideas.
